

Kerdiffstown Park Community Update 29 – Minor Works underway at the Kerdiffstown Landfill Remediation Project.

Date issued: 18/09/19

Minor works are currently underway at Kerdiffstown Park to facilitate the installation of the permanent boundary fence between the existing site and neighbouring lands. These works are being undertaken alongside the installation of perimeter landfill gas monitoring boreholes and the installation of an access path to allow for the wells to be monitored.

All material originates from within the site and is being returned to the site. The material is being moved via the L2005 in order to minimise disruption to adjacent landowner's boundaries and maintain existing hedgerows where possible.

These works are being undertaken in accordance with our EPA licence and planning permission. All works are being conducted under the supervision of Kildare County Council.
